Prevent or reduce pollution and waste and conserve natural resources by responsible and efficient use in all our operations.

Provide and maintain Environment friendly, safe and Healthy work facilities through operational procedures, safe systems and methods of work.

MESSAGE

Welcome to Al Able, a leading trading & contracting company which has set up its business identity in Qatar. The Industrial liberalization and vision of ruling family to transform Qatar in to a strong Industrial Nation and Arab cultural capital, opened opportunity to local and global investors to set up their own business and thus found the space for establishment of AL ABLE TRADING AND CONTRACTING W.L.L

But for the clear vision and willpower of the management combined with the sincere effort of the devoted colleagues, AL ABLE could not have grown into a multibillion company within a short span of time, We extend our hearty thanks to all who spent their time and energy, from senior professionals to the last man in the hierarchy, the people of Qatar and the Government.

We are proud of our strategic and historic partnership with the people of Qatar and our reputed clients and we take pride for being able to play our role in realizing the nation's vision of social, economic and environment development.

Looking back to the past years and casting our eyes to the farthest horizon of business opportunity, we pray Almighty to lead us to the right destination and request the cooperation of our valuable clients, officials and employees and assure them a right share in our development.

SERVICE

SWEET WATER SUPPLY

We supply sweet water in large quantities to different work sites and labor camps throughout the state of the Qatar with a fleet of 200 sweet water tankers and highly skilled and trained professionals to steer and supervise the operation. Tankers are also offered on lease to cater client requirements. We ensure quantity and quality maintaining topmost accuracy and hygiene.

SEWAGE REMOVAL

Al Able waste management division effectively provides waste management services to liquid/semi liquid wastes generated from residential, commercial and industrial units ensuring its treatment. We have more than 250 well equipped trucks and work force which help us fulfill the above requirements.

TREATED SEWAGE EFFLUENT (TSE) SUPPLY

Treated sewage Effluent is an alternate water source which can be used for irrigation purpose. Supply of TSE water to the farms is also done by Al Able Trading.
